SUMMARY

Quantitative Economist with academic and professional experience in economic analysis, econometric modeling, and forecasting. Extensive experience working with US Census Bureau and Federal Reserve data, with a proven track record of streamlining data workflows in R and Microsoft Excel and automating econometric model re-specification in EViews.

SKILLSET OVERVIEW

- | | | |
|------------------------|---------------------------|----------------------------|
| • R Programming | • EViews Model Object | • Data Visualization |
| • Python | • Predictive Analytics/ML | • Data Storytelling |
| • Microsoft Excel | • Time Series Analysis | • Workflow Automation |
| • Econometric Modeling | • Forecasting | • Economic Policy Analysis |

PROFESSIONAL EXPERIENCE

CLU Center for Economic Research and Forecasting

May 2026 – Present

Automated Systems Supervisor

- Created dynamic Excel reporting tables using lookup functions to automate data integration and improve reporting efficiency and consistency.
- Reduced time costs by 75% by supervising the refinement of existing data extraction R scripts.

Campaign Offices (Robert Half Temporary Agency)

Jan 2026- May 2026

Data Entry/Counting Specialist

- Processed 8000+ petition signatures daily, consistently ranking in the top 1% for performance.
- Reconciled physical petitions with electronic records to support accurate election processing.

CLU Center for Economic Research and Forecasting

Nov 2024 – Aug 2025

Automated Systems Technician

- Performed quality assurance on economic reports, graphics, and tables.
- Reduced data workflow time costs by 3 hours per run by automating Census Bureau data extraction in R.

Retail Sales Associate

ACADEMIC EXPERIENCE

CLU MSQE Capstone - Technology Sector GDP Forecast

- This project models and forecasts the U.S. technology industry's production function and future GDP using econometric techniques, an EViews model object, scenario analysis, and combination forecasting, integrating theory, data, and multiple predictive approaches to understand technology's impact on economic growth.

Policy Brief - California Environmental Policy

- This project compares California's main climate policy instrument (Renewable Portfolio Standard (RPS), Low Carbon Fuel Standard (LCFS), and Cap-and-Trade) using criteria of unit effectiveness, cost, efficiency, and equity, providing policy recommendations for fairer, more effective emissions reductions.

Policy Brief - Federal Funds Rate Target Assessment

- This project evaluates whether the current U.S. Federal Funds Target Rate is appropriately set in 2025, drawing on economic data, theory, and expert opinion to argue for maintaining a steady rate amid inflation and growth uncertainties.

Predictive Modelling for Direct Marketing Optimization

- This project applies predictive modeling to optimize direct marketing for a financial institution, using advanced Data Science techniques on a dataset of over one million customers to forecast product adoption, new sales, and purchase counts, guiding targeted marketing strategies.

PROFESSIONAL CERTIFICATIONS

Certified Professional Forecaster Designation: International Institute of Forecasters | 2025

EDUCATION

California Lutheran University	2025
<i>Master of Science in Quantitative Economics (MSQE)</i>	
• GPA: 3.72 4.0 During Last Semester	
California State University Northridge	2023
<i>Bachelor of Arts in Economics</i>	
• GPA: 3.61	

AWARDS

- **Overton Prize:** California Lutheran University – Exemplary Academic Performance During Enrollment
